•Learned about the Backend technologies such as Node.js, MongoDB

PROJECTS

1.CRM Application :-

Developed a CRM app using React and Node.js. The app allowed users to manage their customer relationships, including tracking leads, sales opportunities, and customer support tickets.

2.Movie Ticket Booking APP:- (Clone)

The app allows users to search for movies, view showtimes, and book tickets. It uses React to render the user interface, Redux to manage the app state, and Material UI to provide a consistent look and feel.

STRENGTH

Creative/Adaptable

Excellent Communication Skills

Detail-Oriented

Problem-Solver

Team-Player

Strong work ethic
